## Planning and reporting the way you want it. Faster.

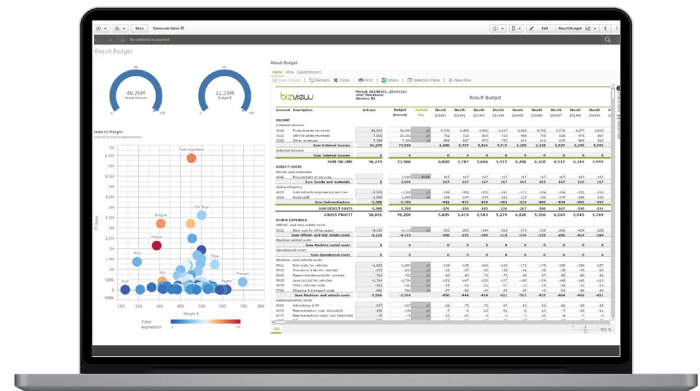

With BizView, Qlik users around the world can add planning and forecasting functionalities to their business intelligence solution. BizView is a state-of-the-art, tightly integrated solution that relieves the frustration of having poor planning systems alongside a modern Qlik solution.

## A seamless integration

BizView is a state-of-the-art platform, that complements Qlik with world class planning and forecasting capabilities. BizView is an open solution that integrates seamlessly with Qlik's business intelligence offerings.

BizView offers a range of features and benefits, such as:

- Incredible adaptability - spreadsheet-like technology
- More than financial planning, such as project, HR, sales and supply chain management
- Mixed data sources, dimensions, attributes and measures
- Support for approval workflow
- Rapid implementation and a seamlessly integrated user experience

## Rapid implementation

Integrating BizView with Qlik is easy. We have a ready-made solution for rapid implementation. The BizView planning and forecasting features are instantly available to Qlik users throughout the organization.

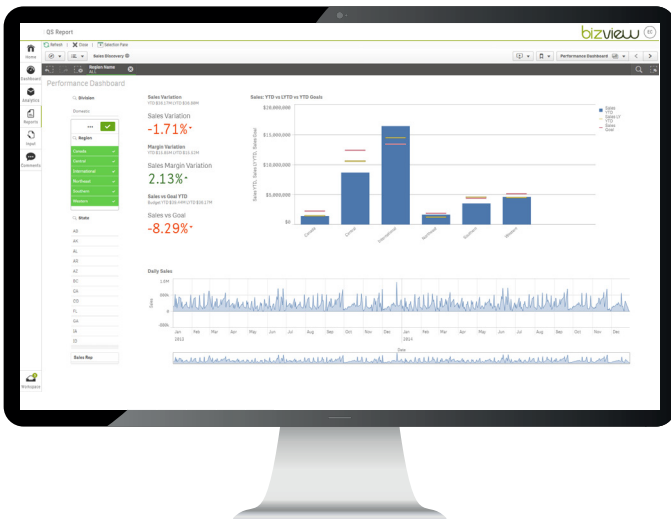

Directly start planning and forecasting with the help of your data. Inside BizView, view any Qlik document side-by-side with your planning forms. It allows you to analyze the data instantly when working on your plans by switching seamlessly between workspace tabs.

## Simplified processes

With the BizView extension for Qlik you can do detailed planning inside your solution. It provides you with a fully integrated planning and forecasting experience, automatically and instantly reflected in your Qlik dashboards and diagrams. Simplify your business processes by collecting all your planning, reporting and analysis in one place.

You can do both your financial and functional planning in BizView. From budgeting and book-keeping, to projects, HR, supply chain, sales management, and much more.

### Speed

Rapid implementation allows you to be up and running rapidly. No waste of time.

### Adaptability

BizView is adaptable to your industry and functional needs the way you want it.

### ROI

Your planning and forecasting solution will save you time and lower your costs.

### Integration

A smooth and seamlessly integrated planning, reporting and analysis experience.
